Things to Figure out

return to screen

(will not return to screen)

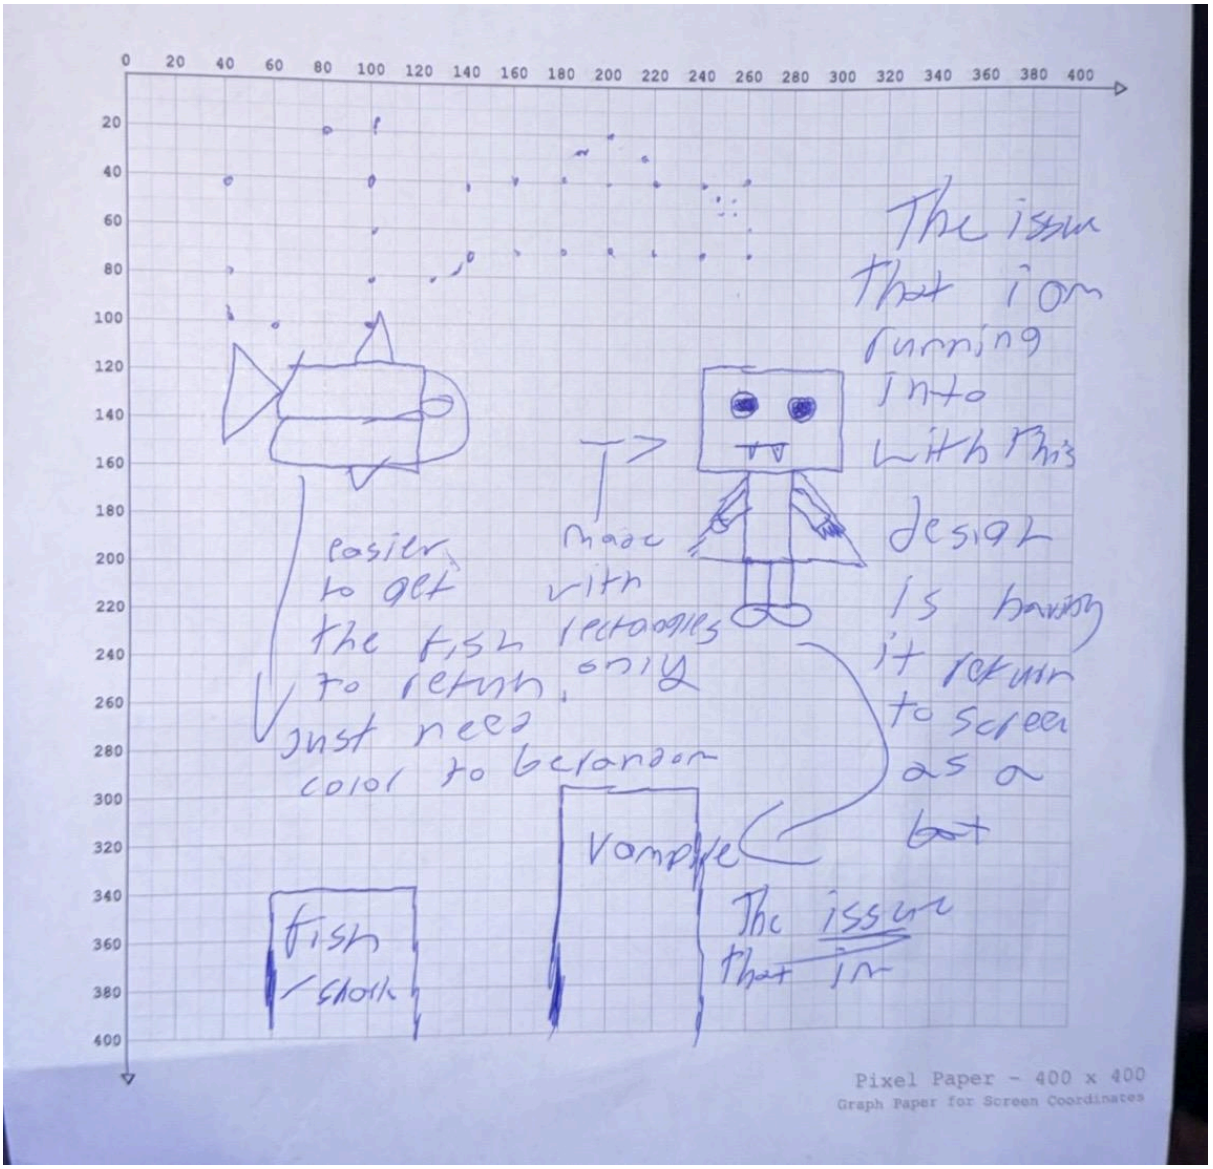

color not random?

have to get colour channels

1. green

2. blue

3. red

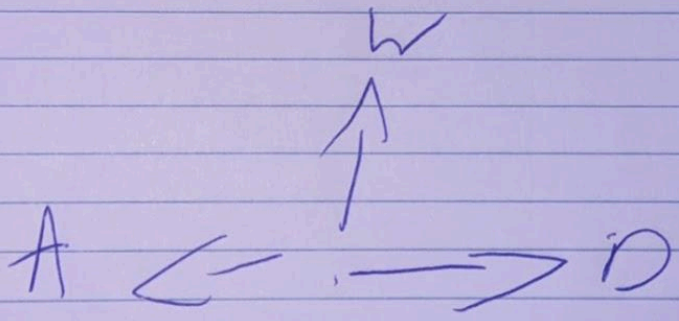

0 20 40 60 80 100 120 140 160 180 200 220 240 260 280 300 320 340 360 380 400
20 40 60 80 100 120 140 160 180 200 220 240 260 280 300 320 340 360 380 400
The issue that i'm running into with this design is having it return to screen as a bat
easier to get the fish returning only just need color to be random
made with rectangles
vampire
fish / shark
The issue that in
Pixel Paper - 400 x 400
Graph Paper for Screen Coordinates

How to control,

D makes fish go forward,

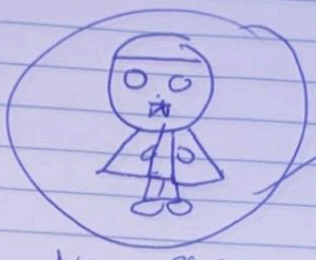

need to figure out how to
get it to dissapear off screen

and return in new color

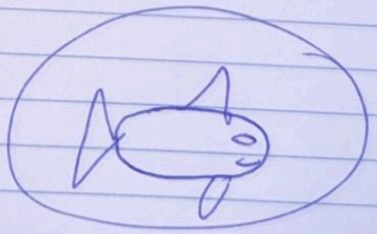

first Sketches

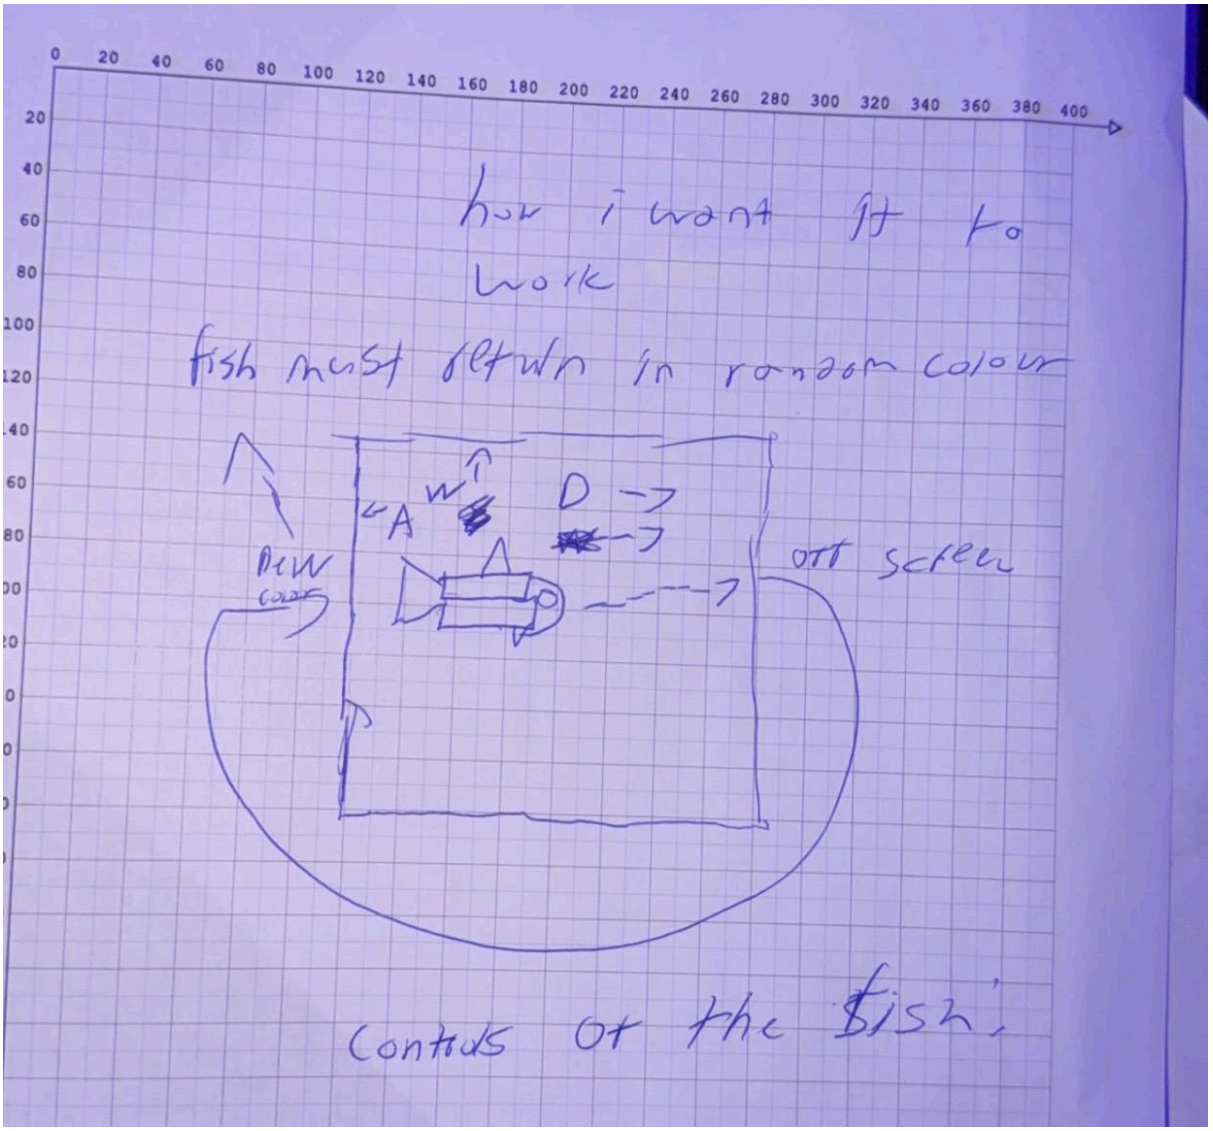

1

vampire that would go off screen and then return as a Bat

Fish / shark.
The idea would be a fish swimming then he goes off screen

how i want it to work
fish must return in random colour
A
W
D
new colour
off screen
controls of the fish.

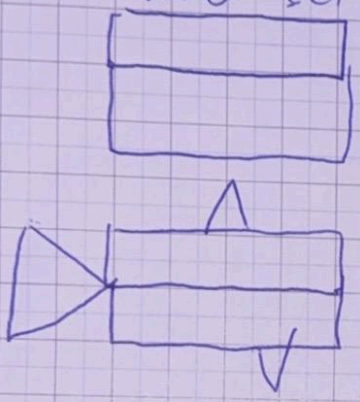

Design of the fish, trying to find a way for it to move together all at once.

fish, now moves by pressing the key binds

(need to put project in new repository old one has crashed, i cannot get back into it. will do later today)

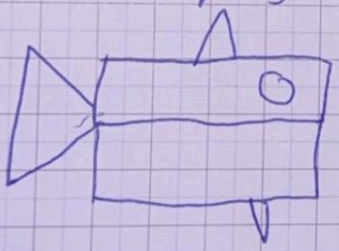

100 120 140 160 180 200 220 240 260 280 300 320 340 360 380 400

step 1 body set

The base body used for fish

added tail an fins

Problems

fish at first looked like a truck since it was just 2 rectangles.

fixes

I was able to add in ~~red~~ Triangles and circles to make it look more like a fish
